216-445-9009

Or email:
CBHresearch@ccf.org

Patients may qualify for this study if they:

- Are 65 to 80 years old
- Overall healthy

This study will look at the effect of physical activity, sleep quality, and genetics on inflammation related brain changes seen in the brain over two years in older adults.

Participation will last 2 years including 7-9 clinic visits and may involve all or some of the following procedures: 2 physical activity assessments, 2 PET scans, 2 MRI scans, 2 lumbar punctures, sleep study, genetic testing, and evaluations of memory function. Financial compensation will be provided.

If you are interested in participating or would like additional information, please contact us at 216-445-9009 or email: CBHresearch@ccf.org
