

What is the COBRE study?

COBRE stands for Center of Biomedical Research Excellence. This COBRE was started in 2016 with a goal of better understanding the causes of neurodegenerative diseases like Alzheimer's and Parkinson's disease. Another goal of the COBRE is to grow the biomedical research resources in Southern Nevada.

The COBRE is funded by an Institutional Development Award (IDeA) from the National Institutes of Health.

Location

Study assessments will be completed at:
Cleveland Clinic Lou Ruvo Center for Brain Health
888 West Bonneville Avenue
Las Vegas, NV
702.483.6000

A partnership of

CCF IRB #: 15-874
Approval Date: 9/14/2018
Expiration Date: 7/30/2019

The COBRE Study

Put Your Brain to Work for Science

How does it work?

Participants will be seen yearly completing the following assessments

- Brain scans
- Memory tests
- Labwork

No medication will be given.

Join us

We're looking for people who represent the rich diversity of our Nevada communities. You and your brain can help.

Why?

You can contribute to brain health science by participating in an observational research study (no medication will be given).

Please consider joining our study if you:

- Are 55-90 years old
- Can complete an MRI scan
- Have a study partner

We need individuals with:

- Mild cognitive impairment
- Alzheimer's Disease
- Parkinson's Disease
- No memory or thinking problems

How to join:

- Call 702.701.7944
- Email HealthyBrains@ccf.org
